# Outsourcing and Architecture

Dealing with New Architectures and Old Culture

Christopher Blake

Brussels

20<sup>th</sup> April 2004

## Overview

IT training and consulting

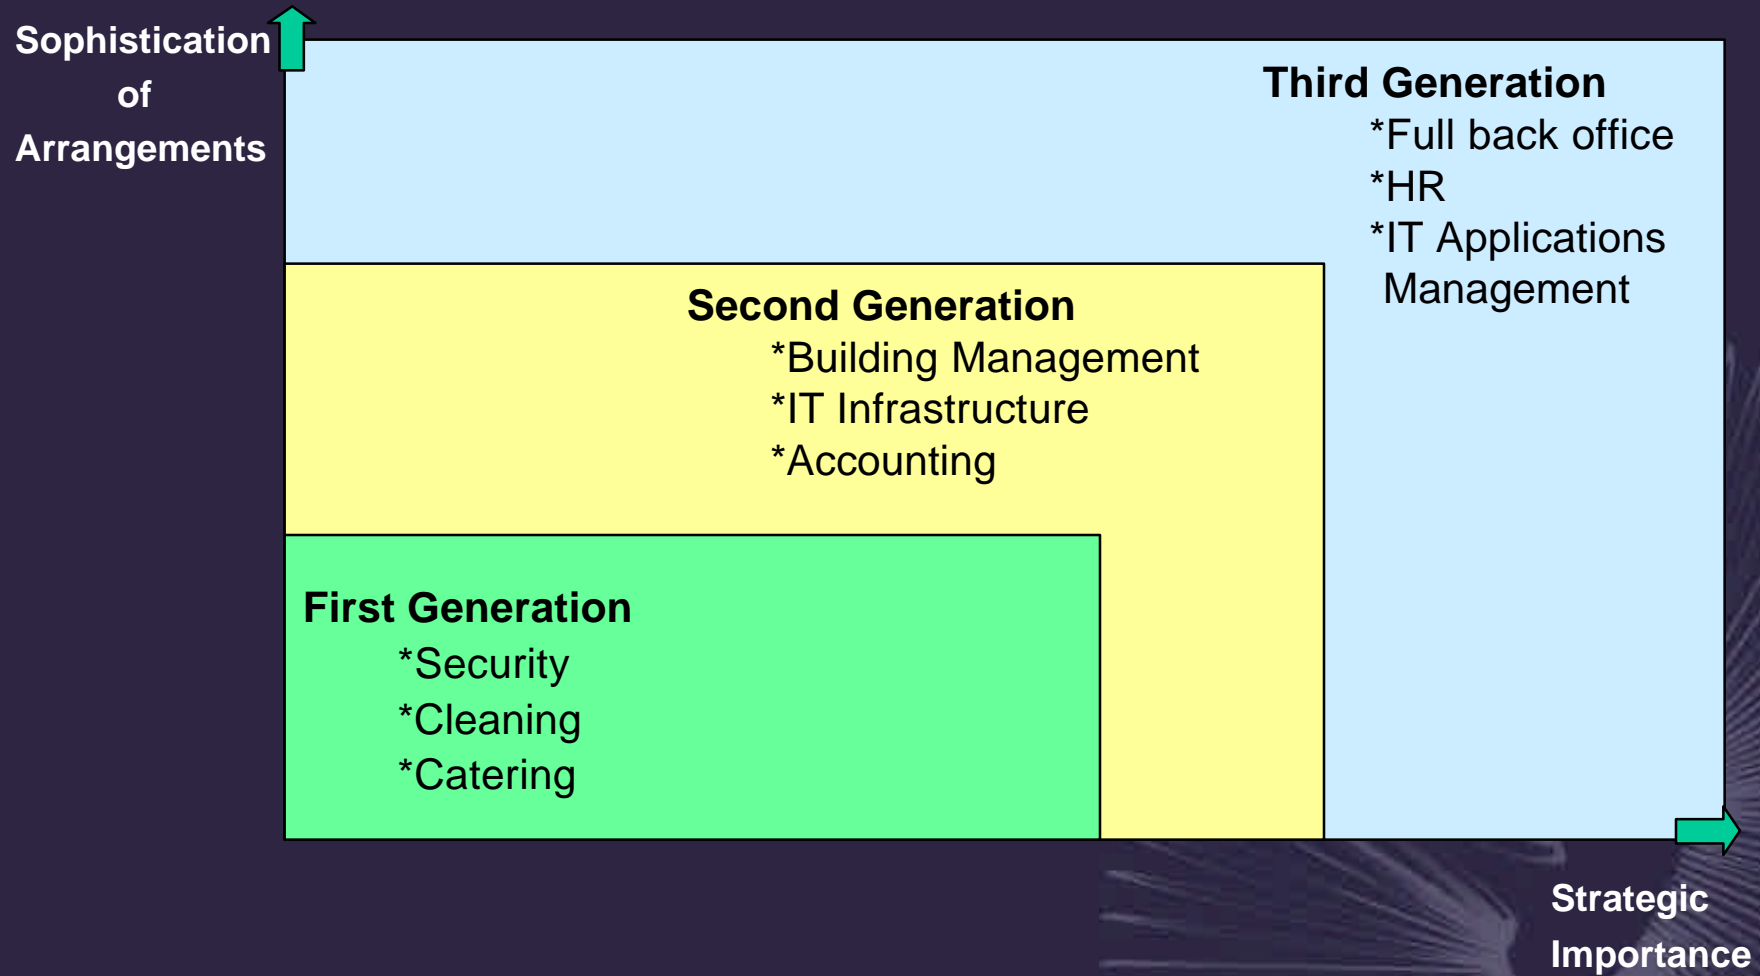

- Outsourcing
  - Where, what, why, how ...
- Back to reality
  - Why outsourcing fails
- Archaeology vs. architecture
  - Digging into the past
  - Looking into the future
- Whither architecture?

IT training and consulting

# Evolution of outsourcing

IT training and consulting

# Characteristics of Outsourcing Arrangements

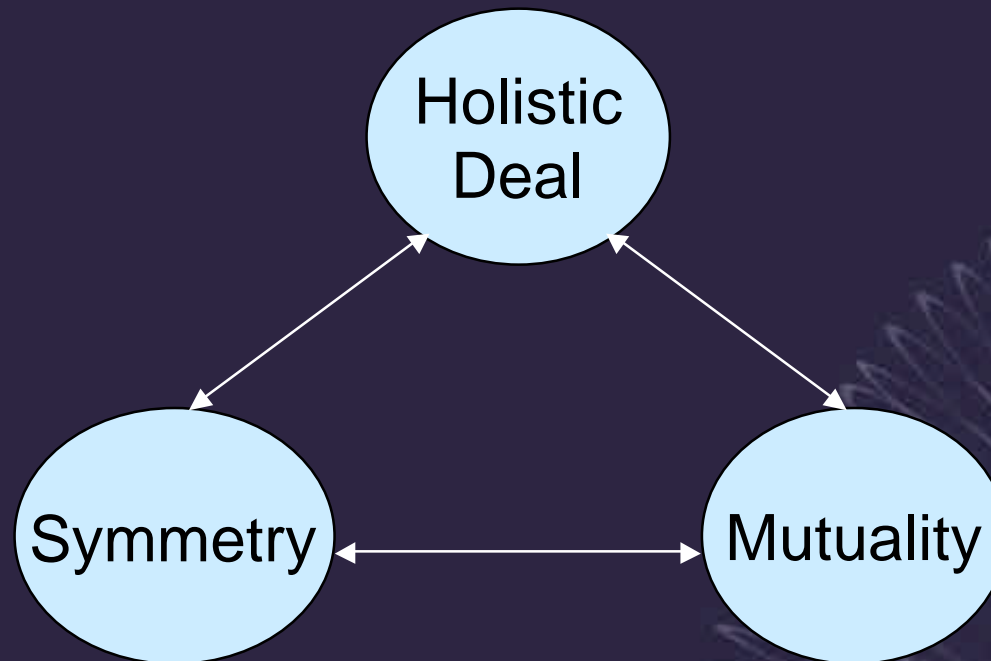

- **First Generation**
  - Fixed price
  - Fixed scope
  - Penalties
  - Rigorous Change Management
- **Second Generation**
  - Flexible scope
  - Cost plus / open book
  - Penalties and bonuses
  - Evolutionary structures enshrined
- **Third Generation**
  - Strategic joint goals
  - Joint performance measures
  - Success rewards
  - Flexible scope

# The Key Components for Good Outsourcing governance

IT training and consulting

IT training and consulting

## The Key Components for good Outsourcing Governance

- Before approaching an outsourcer
  - define overall objectives
  - certainty vs. flexibility
  - measure the current situation
  - shape the proposition
  - define governance needs
  - build consensus

IT training and consulting

## The Key Components for Good Outsourcing Governance

- During outsourcing negotiations
  - codifying success
  - bonuses and penalties
  - relationships and interfaces
  - defining responsibilities
  - assessing performance and style

IT training and consulting

## The Key Components for Good Outsourcing Governance

- After the deal is done
  - managing people during handover
  - transition from resource management to service management
  - retaining key knowledge and skills
  - continuous improvement
  - monitoring outcomes
  - review and renewal

## Back to Reality

IT training and consulting

- Why does outsourcing fail?
  - Outsourcing garbage
  - Seduction is easier than marriage
  - Change to service-based culture
  - Lack of trust
  - Blame
  - Relationships
  - Bad metrics
  - Expertise
  - Training
  - Change management

IT training and consulting

## Current Architecture Trends

- Main Points
  - Heavy commitment from US Federal agencies to Enterprise Architecture
  - Zachman is de-facto standard
  - Open Group TOGAF 8 very well received
- Major Issues
  - Architecture inflexibility
  - Integration issues
  - Governance
- Key Directions
  - Virtualisation
  - Automation
  - Integration
  - Tool support becoming more coherent and achievable
  - Network centricity continues to advance apace

IT training and consulting

## Archaeology and Architecture

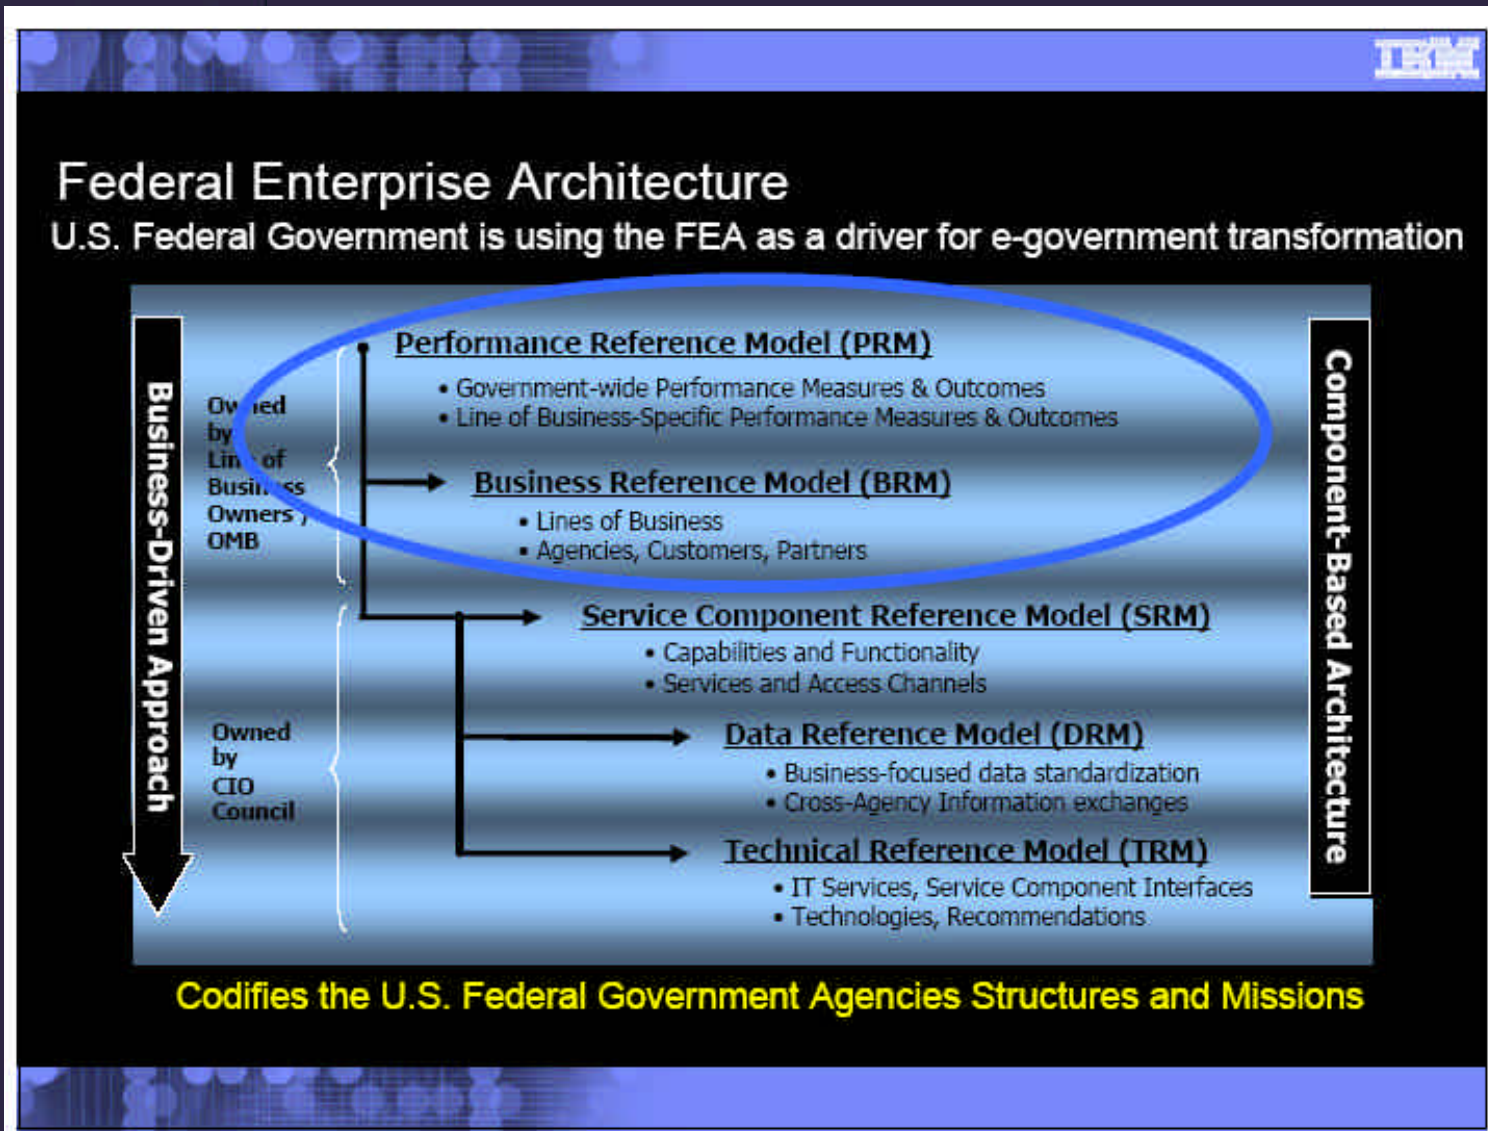

- Most architecture departments are engaged in mapping and naming activities – a retrospective view
- As new technology appears it simply overlays the current
  - Increases level of complexity
  - Reduces level of understanding of legacy
- Taxonomy is important, but not a driver
- Business must always drive architectural activity
- Architects become narrowly focussed and attempts at enterprise views are constricted by tree-hugging
- Try mapping your architectural models, design rules and standards onto the new agile architectural concepts ...
  - Virtualisation
  - Automation
  - Integration

# Federated Implementation

IT training and consulting

IT training and consulting

# IBM's View (thanks for a clear slide !!!)

## On demand business: The big picture

@business on demand

### Business Model

- Reconfigure Components, Partners
- Optimize Business Processes
- Refresh Products and Services

+

### People & Organization

- Create a Flexible Structure
- Adapt Governance Model
- Manage Cultural Change

+

### Technology Platforms

- Build Connectivity Platforms
- Automate IT Processes
- Enable a Virtualized Infrastructure

=

### Value Creation

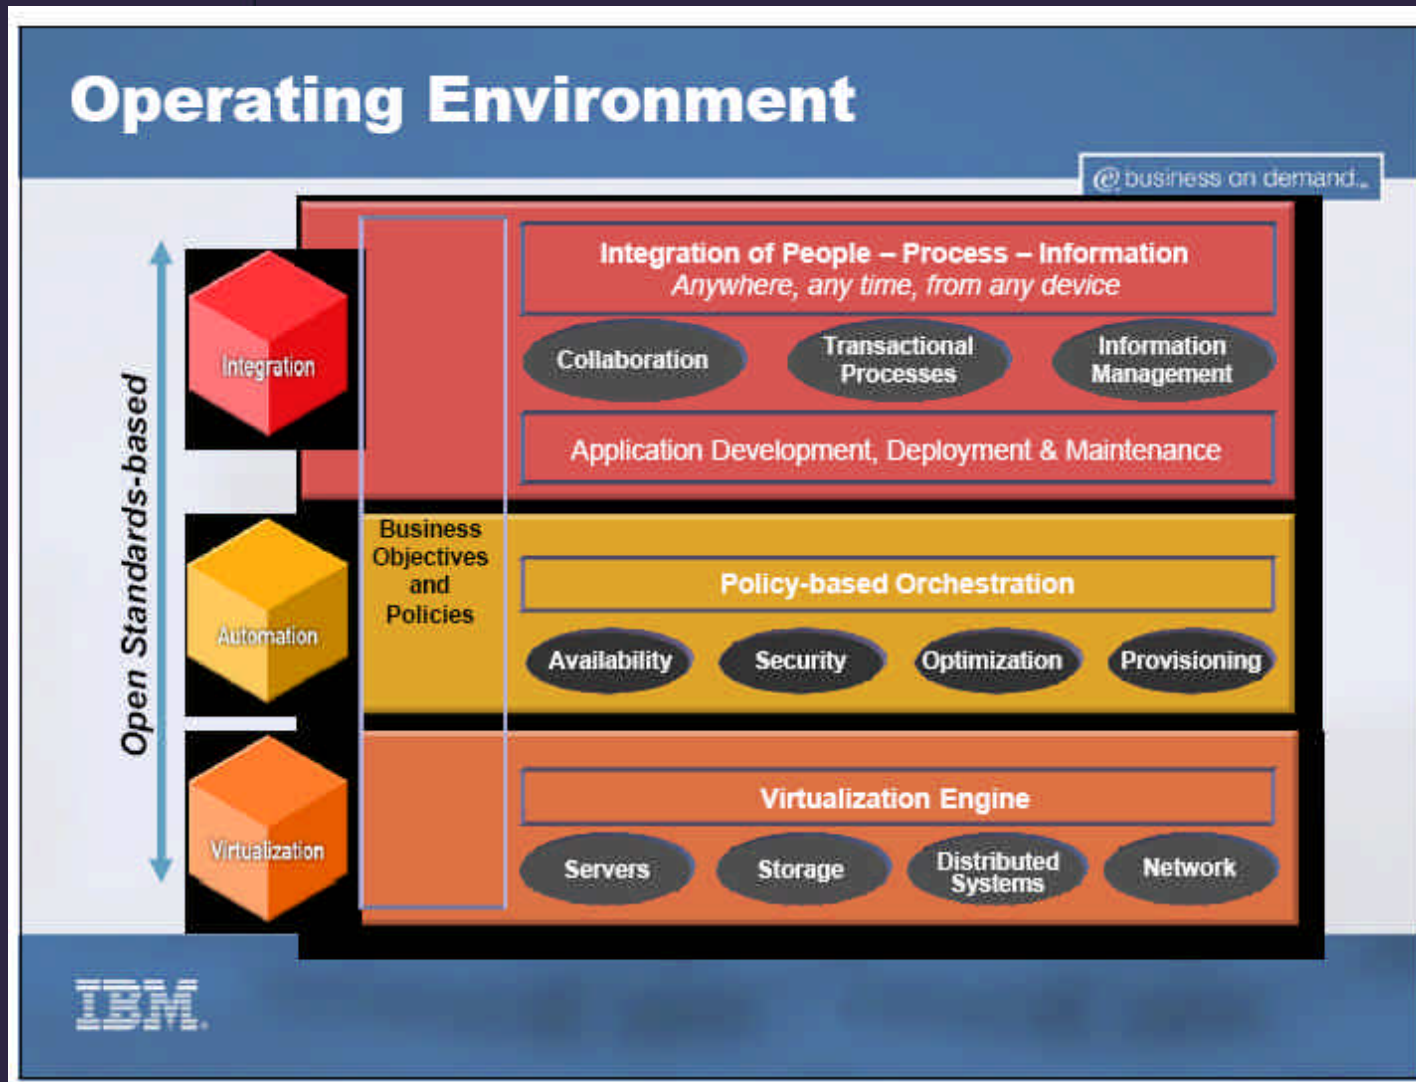

- Grow Revenue
- Improve Margins
- Optimize Capital
- Manage Risk

# Integration Scenario - Outsourcing

- Replacement
- Where do we draw the line?
- Zachman Rows 1-3

IT training and consulting

# Architectural activity and exterior forces

Business Model Changes

Architectures developed differentially by different parties

Business model no longer well supported

IT training and consulting

# Govern to the business model

Strong governance realigns architecture to changed business model accommodating external forces

IT training and consulting

## What Now?

- Deployment
  - Service patterns
  - Policies
- Common methodologies
- Strategies for procurement
- Refocus architecture for
  - Virtualisation
  - Automation
  - Integration
- No more archaeology!
