9-Aug-2012	i-3	Cragun, Dona	Approve	INDEPENDENT	Editorial	205	semget	12296	<p>Given the changes implemented in TC1 denoted by entries in this draft with the notation "Change Number: XSH/TC1/D5/0335", the FUTURE DIRECTIONS section of semget() should have been updated to note that the changes specified by Austin Group Bug #355 may go into Issue 8.</p> <p>This issue has also been submitted directly to The Austin Group as issue #575 (see http://austingroupbugs.net/view.php?id=575).</p>		No	<p>Add a change note after TC1, P205, L12296 to change "None" on Issue 7, P1838, L58710 to "A future version may require that the value of the semval, sempid, semcncnt, and semzcnt members of all semaphores in a semaphore set be initialized to zero when a call to semget() creates a semaphore set. Many semaphore implementations already do this and it greatly simplifies what an application must do to initialize a semaphore set."</p>	Revised	<p>After page 197 line 12291 add a new part to change number XSH/TC1/D5/0536: On Page: 1838 Line: 58710 Section: semget() In the FUTURE DIRECTIONS section, change from: None to: A future version may require that the value of the semval, sempid, semcncnt, and semzcnt members of all semaphores in a semaphore set be initialized to zero when a call to semget() creates a semaphore set. Many semaphore implementations already do this and it greatly simplifies what an application must do to initialize a semaphore set.</p>			
16-Jul-2012	i-2	Karocki, Piotr	Approve	INDEPENDENT	General				<p>About filenames outside portable character set. There are, in many languages, characters which could be composed from letter and diacritic (and similar) marks. It could be much more than one 'combining character' (e.g., in hebrew, "dagesh", accent, vowel - all applied to one letter, "bet"). Should f_open() open file, when its parameter use 'hebrew letter bet with dagesh', and file is stored with name using 'hebrew bet' and 'hebrew dagesh'? I cannot find such information in 1003.1 text.</p>		No	<p>(proper function name, without underscore, cannot be used in comment :)</p>	Rejected	<p>This item is not in scope of the TC document under ballot. The comment may be considered for a possible future revision.</p>
