Welcome to our March 2008 Jericho Forum® Newsletter. As usual, feel free to share our news with your colleagues, and [email us](#) with your comments.

Jericho Forum Conference during RSA - April 10

On April 10th we have our conference in San Francisco. This coincides with the end of RSA. Our program starts with lunch at 11.30am and closes with a networking session at 4.00pm. We are delighted to have Philippe Courtot, Chairman & CEO, Qualys, as our opening keynote speaker – on “The Road Ahead to a Secure Internet”. We then have 3 short presentations:

- The business case why you should care and plan for de-perimeterisation (Paul Simmonds)
- What we have achieved since 2005 (Steve Whitlock)
- Where we are heading now ... our strategy for solutions (Adrian Seccombe)

after which we will run an interactive “masterclass” on “**How to enable secure collaboration**”, in which our presenters will:

- describe real-world examples of how Jericho Forum members have implemented secure working in de-perimeterised environments
- explain how these examples conform to our Jericho Forum principles
- be ready to answer questions along the way.

Guests Chenxi Wang (Forrester), Ellen Messmer (NetWork World), and Becky Bace (Consultant) have accepted our invitation to participate in this session, to represent analyst and press views and compare and contrast them with those of the Jericho Forum presenters, and also to ask their leading questions, as well as act as moderators and interrogators to ensure the questions for the audience are answered and all viewpoints are heard.

We have a capacity audience registered – including from the press and analysts, and look forward to reporting prominent press and publicity coverage, as well as more members, in our next Newsletter.

And then ...

Jericho Forum Spring Conference – April 22

Our Spring Conference on Tuesday April 22nd, in the London Room at the Grand Hall, Olympia, is again hosted by Reed Exhibitions at Infosecurity Europe. Our opening keynote speaker is Mark Curphey, Microsoft – on “The Great Information Security Junk Yard Challenge”. We then have 3 presentations on aspects of collaboration in a de-perimeterised world, after which we again will run a “masterclass” on “**How to enable secure collaboration**”, explaining our Collaboration Oriented Architecture (COA). As in our April 10 conference in San Francisco, this is a great opportunity for attendees to put their questions to our Jericho Forum presenters and get them answered, as well as to put forward their own views. We encourage you to send this message to those who you feel need to take advantage of this opportunity.

But our Spring Conference is not the only time that Jericho Forum issues are prominent during the Infosecurity Europe event:

- **Tues April 22**
 - 15:20-15:45 [Technical Theatre] De-perimeterisation: Fact or Fiction? Geraint Price, Lecturer, Royal Holloway, University of London
 - 10:00-10:25 [Technical Theatre] The Case For Application Security. Taylor McKinley, Product Manager, Fortify Software
- **Wednesday April 23**
 - 11.30–12.15 [Hall of Fame, Keynote Theatre] RFIDIOOTS - Practical RFID Hacking Without Soldering Irons. Adam Laurie, Director, The Bunker (Jericho Forum member)
 - 12:00-12:25 [Technical Theatre] Web 2.0: Threats you didn't expect, attacks your network security isn't blocking. Mike Shema, Security Research Engineer, Qualys (Jericho Forum member)
 - 12:40-13:05 [Business Strategy Theatre] Network Access Control - It's really about the endpoint. Richard Jacobs, Chief Technology Officer, Sophos Plc
 - 14:40-15:05 [Business Strategy Theatre] Accurate Database IPS – Because Monitoring Data Loss is Shutting the Stable Door after the Horse has Bolted. Paul Davie, COO and Founder, Secerno (Jericho Forum member)
- **Thursday April 24**
 - 10:00-10:25 [Business Strategy Theatre] Your Car Passed Inspection...But What About your Software? Matthew Moynahan, CEO, Veracode Inc
 - 10:30-11:45 [Interactive Theatre] Which is more Important – Compliance, Security or Operability? Adrian Seccombe, Global CISO , Eli Lilly (Jericho Forum Board Member)
 - 12:00-13:15 [Interactive Theatre] Is Security Keeping pace with Mobilisation and Convergence? Paul Simmonds, Global Information Security Director, ICI (Jericho Forum Board Member)
 - 12:00-12:25 [Business Strategy Theatre] Delivering Business Benefit from Identity - Where do you start, where does it end? Robert Temple , Vice President - Security Technologies, BT (Jericho Forum member)
 - 12:40-13:05 [Technical Theatre] The future of authentication. Yurong Lin, CEO, Deepnet Security Ltd
 - 14:00-14:25 [Business Strategy Theatre] Protecting Workers Outside the Corporate Network from Web Threats. Dan Nadir, Vice President of Product Strategy , Scansafe (Jericho Forum member)
 - 14:30-16:00 [Interactive Theatre] The Lions Den. Paul Simmonds, Global Information Security Director, ICI (Jericho Forum Board Member)

Collective name for IT Architects

Arising from an email discussion on the word “architecture”, someone asked what is the group name for architects? A colleague wasted no time to propose “an argument of architects”. But then someone else with a more classical viewpoint noted that since "architect" comes from the Greek arkitekton (= head builder), many heads would suggest the collective name "hydra". So a group would perhaps be a hydration? or even a "hydrant"? Any advance?
