

Green Hills Software, Inc. Corporate Fact Sheet

Market

Green Hills Software is the technology leader in real-time operating systems (RTOS) and device software optimization (DSO). Electronic product developers use Green Hills Software's products and services to develop the software for everything from MP3 players to jumbo jets. Examples include:

- **Automotive**—controllers for anti-lock brakes, engines and transmissions; body, chassis and safety electronics; vision systems; telematics and infotainment systems
- **Avionics**—flight-control systems, collision avoidance systems, navigation and communication systems, cockpit displays, mission computers, engine controllers and monitoring systems
- **Consumer electronics and computer peripherals**—cellular phones, MP3 players, digital cameras, computer disk drives, printers, set-top boxes
- **Defense**—military radios, weapons systems, radar, simulators and trainers
- **Industrial automation**—manufacturing and test equipment, laboratory instrumentation, security systems
- **Medical**—diagnostic and monitoring equipment
- **Telecommunications and networking**—switches, routers, hubs, base stations, communication satellites

Company

Privately held, Green Hills Software was founded in 1982. The company has been profitable every year since 1983 and has enjoyed an average growth rate of 30% per year. Green Hills Software is the world's fastest growing and second largest supplier of real-time operating systems. Headquartered in Santa Barbara, California, the company has over 260 employees in 30 offices throughout the United States, Europe and the Asia Pacific region.

Executive Team

Dan O'Dowd, Founder and Chief Executive Officer

Jack Douglas, Executive Vice Chairman

Jeff Hazarian, Chief Financial Officer

David Chandler, Vice President of Sales

Craig Franklin, Vice President of Advanced Products

David Kleidermacher, Vice President of Engineering

Martin Nappi, Vice President of European Operations

Christopher Smith, Vice President of Marketing

Solutions

Green Hills Software's MULTI development environment and royalty free INTEGRITY operating system family enable developers to produce devices that are totally reliable, absolutely secure and yield maximum performance—in the least time and with the lowest costs. By standardizing on MULTI and INTEGRITY, organizations reduce their device software development costs while increasing productivity.

INTEGRITY Operating System Family

- **INTEGRITY** RTOS—for applications with requirements for high reliability and security
- **INTEGRITY-178B** RTOS—for applications requiring safety and security certifications
- **INTEGRITY Padded Cell** RTOS—safely and securely runs Windows XP, Linux and other insecure legacy software
- **INTEGRITY Workstation, Server and Thin-client** OS—for secure computing on COTS PC hardware
- **veIOSity** kernel—small and fast for cost-sensitive and resource-constrained applications
- **μ-veIOSity** microkernel – ultra-small, ultra-fast, royalty-free for deeply embedded devices

Embedded Software Development Tools

- **MULTI** and **AdaMULTI** integrated development environments (IDE)
- **Green Hills** compilers—C, C++, Ada and Fortran
- **TimeMachine** 4-D debugger

Hardware-Assisted Debugging

- **SuperTrace** probe—high-performance, real-time recording of processor's execution history
- **Green Hills** probe—high-performance debugging and run-control
- **Slingshot** debug device—low-cost debugging and run-control

Corporate Headquarters

Green Hills Software, Inc.
30 West Sola Street
Santa Barbara, CA 93101
Tel: 805.965.6044
Fax: 805.965.6343

Safety Critical Products Headquarters

Green Hills Software
34125 US Hwy 19 North, Suite 100
Palm Harbor, FL 34684
