

Certification is used to ensure a guaranteed level of knowledge regarding a particular subject.

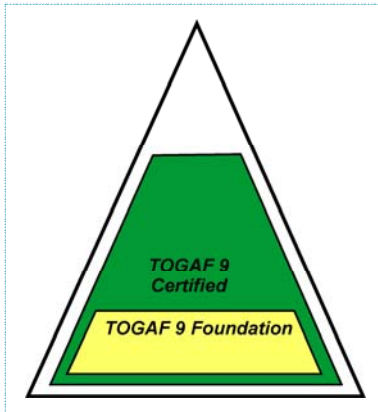

TOGAF™ 9 certification is intended to ensure that individuals:

- Are knowledgeable about TOGAF 9
- Have demonstrated a common baseline of knowledge on the subject
- Can use TOGAF 9 certification to help establish the foundations for a career as an Enterprise Architect

From Knowledge to Competence

TOGAF 9 certification provides the opportunity to control your level of exposure to the standard, enabling you to decide what level of knowledge is right for you.

Aimed at individuals, professionals, and budding enterprise architects, Level 1 **Foundation** provides candidates with a grounding in the basics of TOGAF 9, and helps professionals and architects build on their existing experience, improving their ability to make enterprise architecture happen.

TOGAF 9 Level 2

Certified provides validation that, in addition to knowledge and comprehension, the candidate is able to analyze and apply knowledge of TOGAF 9 in a real environment.

Embracing the Future – Protecting the Past

Considerable effort has gone into the development of the various iterations of TOGAF by members of The Open Group, and we are keen to protect the investment that users in those iterations have made.

That’s why we have introduced a certification link between TOGAF 8 and TOGAF 9.

This means that candidates who are already TOGAF 8 certified do not need to start again with TOGAF 9, but can study simply to upgrade their knowledge to align it with TOGAF 9.

TOGAF™ 9 People Certification

Examine the Possibilities

Gone are the days when attending a course was sufficient experience to achieve certification in TOGAF. Now TOGAF 9 introduces a higher level of competence altogether with the introduction of an exam-based certification regime.

All candidates will be required to pass an examination in order to achieve certification.

Level	Name	Requirements
1	TOGAF 9 Foundation	<ul style="list-style-type: none"> • Multiple choice exam • 40 questions/60 minutes • Supervised
