

**INTEROPERABILITY WORK GROUP
22ND OF OCTOBER
INFORMATION ARCHITECTURE
WORKING GROUP
INTEROPERABILITY ISSUES**

Presented At: Open Group EA Practitioners Conference – Amsterdam 2010

Presented By:

Mr. Robert (Bob) Weisman

Chair Information Architecture Working Group

Robert.weisman@buildthevision.ca

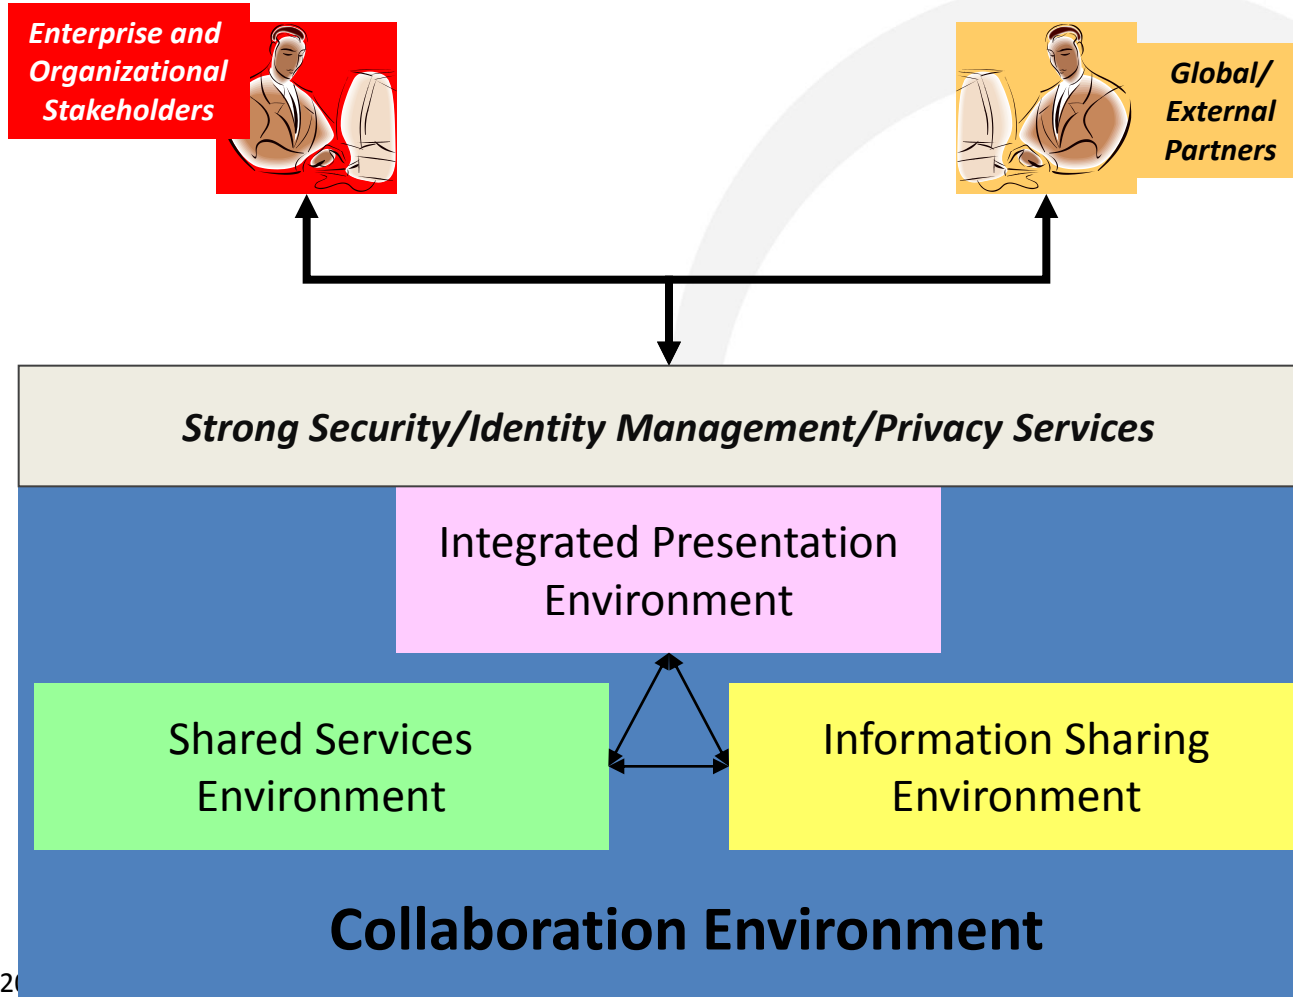

To enable stakeholders to individually and collaboratively make informed decisions through the timely availability of quality information.

- An Informed Decision
 - one based upon a situational awareness that includes all of the relevant information available at the time
- Collaboration
 - ability to have humans and/or machines cooperate to discover the best possible decision based upon the available information.
- Quality Information
 - As defined by the stakeholders.
 - Getting the perfect information two hours after the fact is not useful; good enough information three hours before is.
 - Available in a clear and understandable manner
 - Communicating quality in an unambiguous manner in both business and technical terms is crucial.

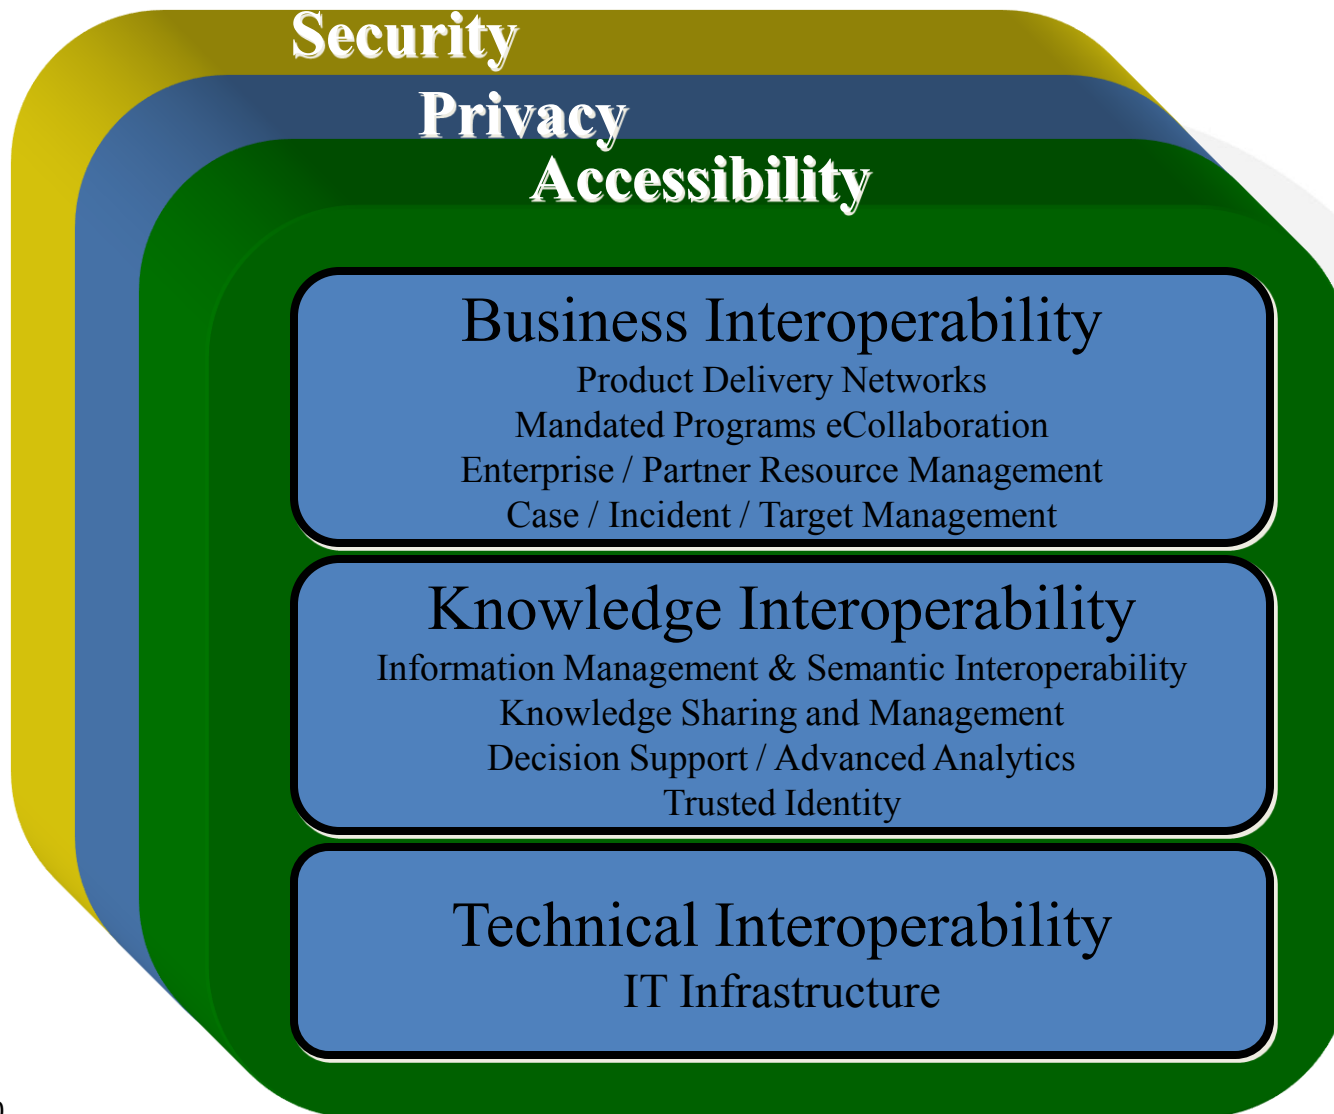

The Architecture Vision The Collaboration Environment

To enable Collaboration supported by an Information
Sharing Environment

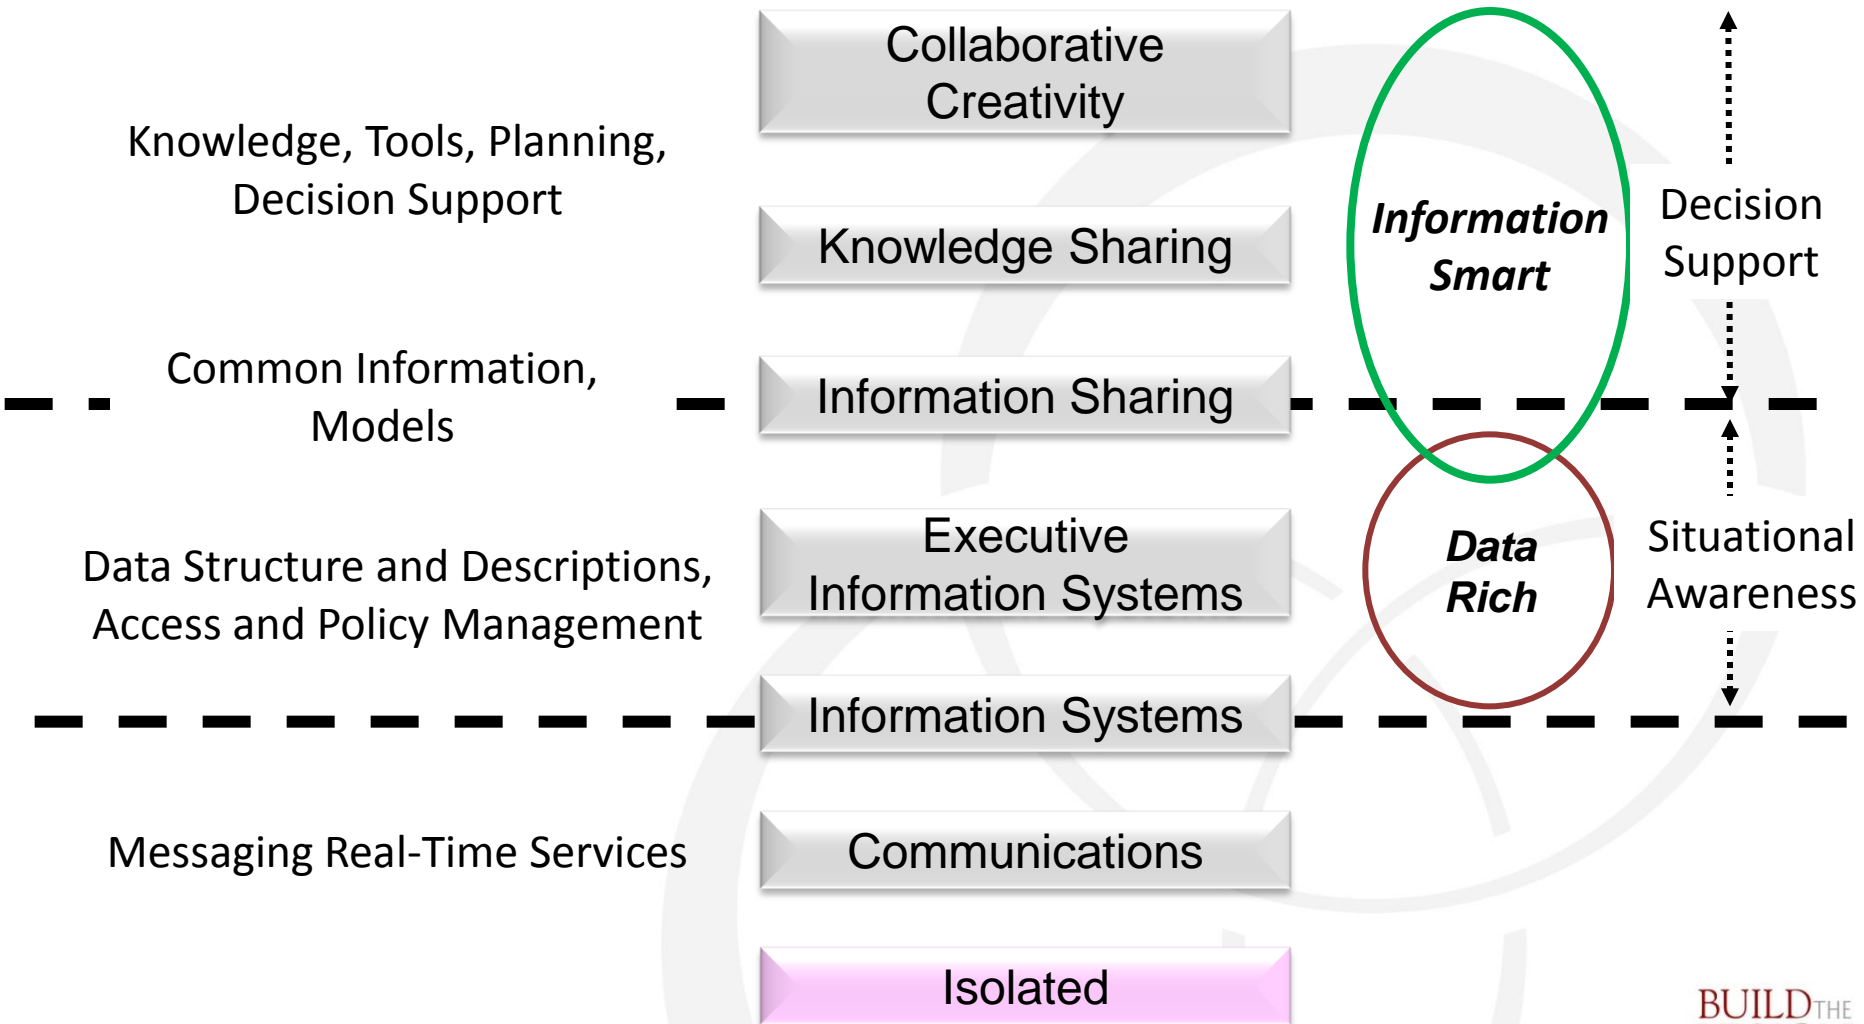

Interoperability and the Government of Canada

Information Sharing Capabilities Model

Information Architecture
 Working Group

(Combined Communications and Electronics Board 1997)

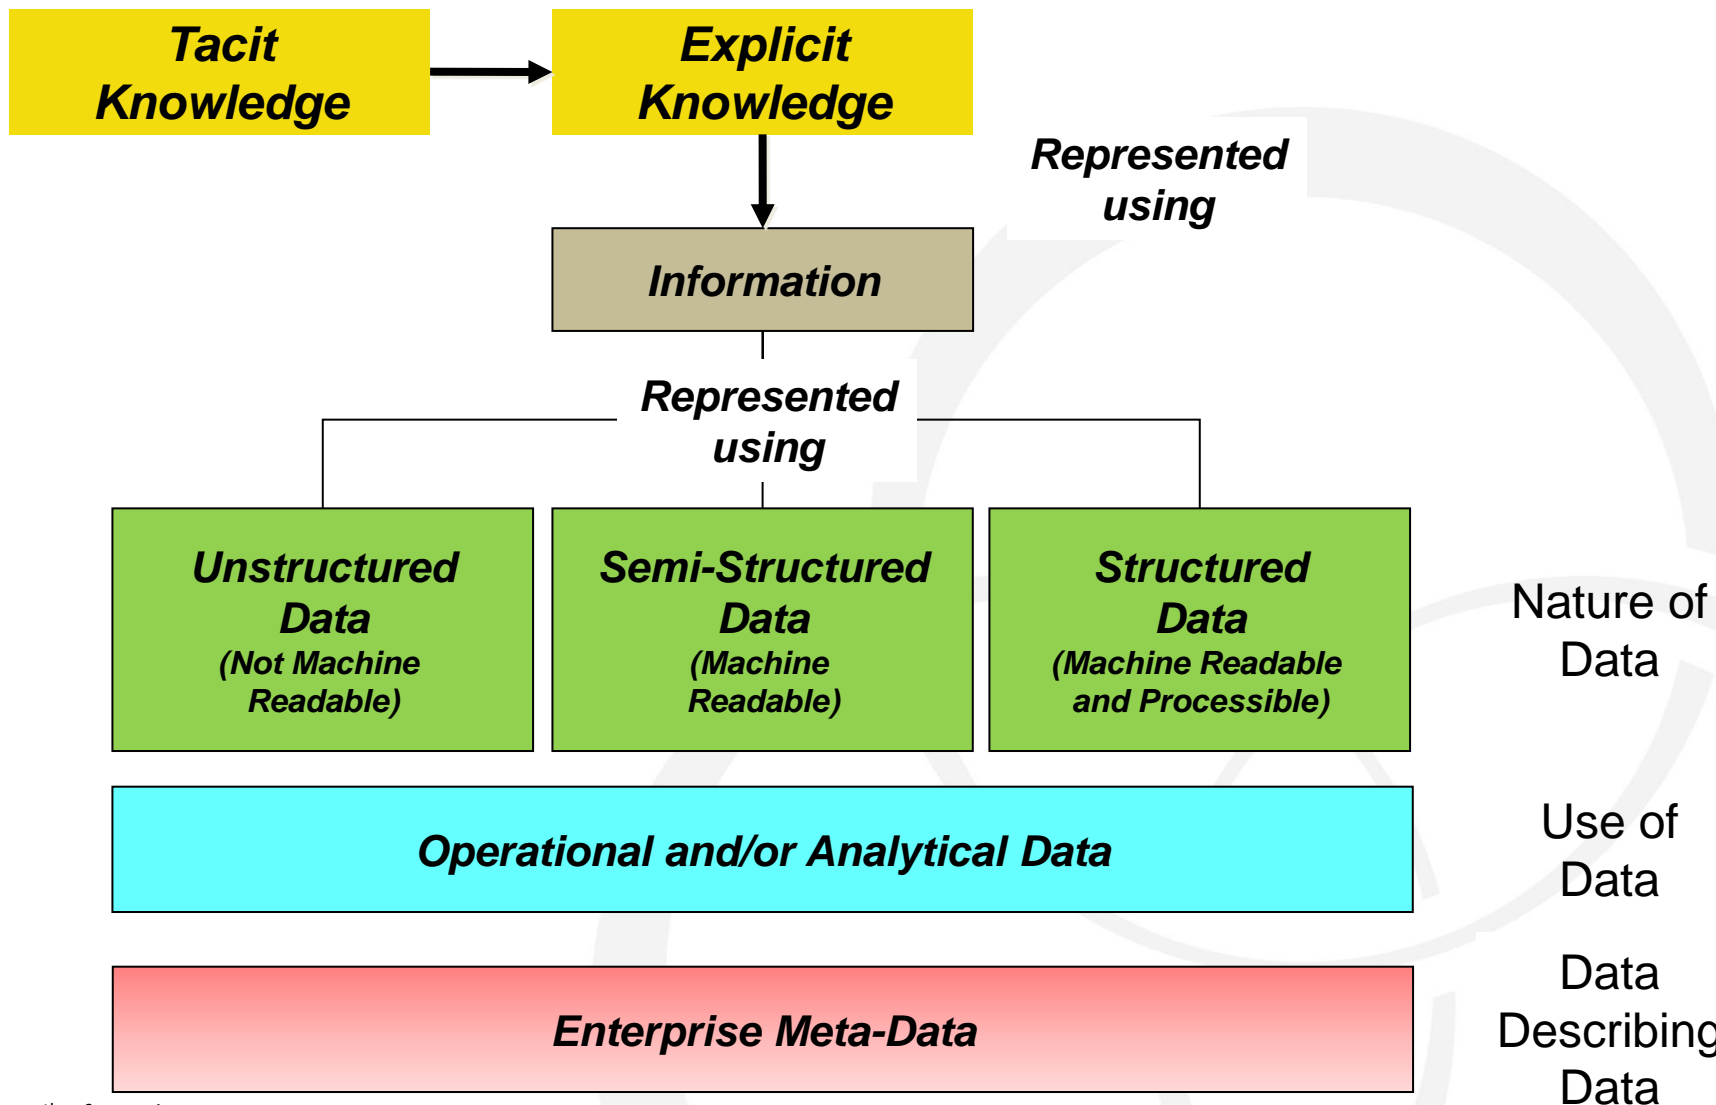

Maturity Model for Data, Information and Knowledge Sharing

		Value Proposition
Degree 6	COLLABORATIVE CREATIVITY Seamless Sharing of Knowledge Integrated Knowledge Environment Intelligent Decision Support PERSONALIZED SERVICE DELIVERY	<i>Rapid Flexible Client Service</i> • <i>Rapid Implementation Legislative Change</i> • <i>Ability to Operate Dispersed Canada/World</i> • <i>Significantly Reduced Training Overhead</i>
Degree 5	KNOWLEDGE SHARING Ability to Share Key Corporate Knowledge Corporate Knowledge Model Advanced Decision Support GOAL/SCENARIO DRIVEN SERVICE DELIVERY	• <i>Empower Knowledge Workers</i> • <i>Capture Personnel Expertise</i> • <i>Learning Organization</i> • <i>Reduced Workforce</i>
Degree 4	INFORMATION SHARING Seamless Sharing of Information Integrated Information Environment EFFECTIVE PERFORMANCE MANAGEMENT FULL CROSS-PROGRAM SERVICE DELIVERY	• <i>Decision Support to all Clients and Employees</i> • <i>Ability to Achieve Results Based Organization</i> • <i>Minimal Infostructure</i>
Degree 3	DATA SHARING Ability to Integrate Key Corporate Information Corporate Information Reference Model Executive Information Systems BASIC PERFORMANCE MANAGEMENT BASIC EVENT DRIVEN SERVICE DELIVERY	• <i>Integrated Key Corporate Data</i> • <i>Critical Executive Decision Support</i> • <i>Reduced Infostructure</i>
Degree 2	DATA EXCHANGE Ability to exchange data in between systems Structured Messages/e-forms PROGRAM-DRIVEN SERVICE DELIVERY (e.g. CCRA Tape File)	• <i>Rudimentary Cross-Program Coordination</i> • <i>Common Understanding of Data across Departments</i>
Degree 1	NETWORK CONNECTIVITY Ability to Access Across Organization Network, web-site access and e-mail	• <i>Network Consolidation</i> • <i>Increased Security</i>

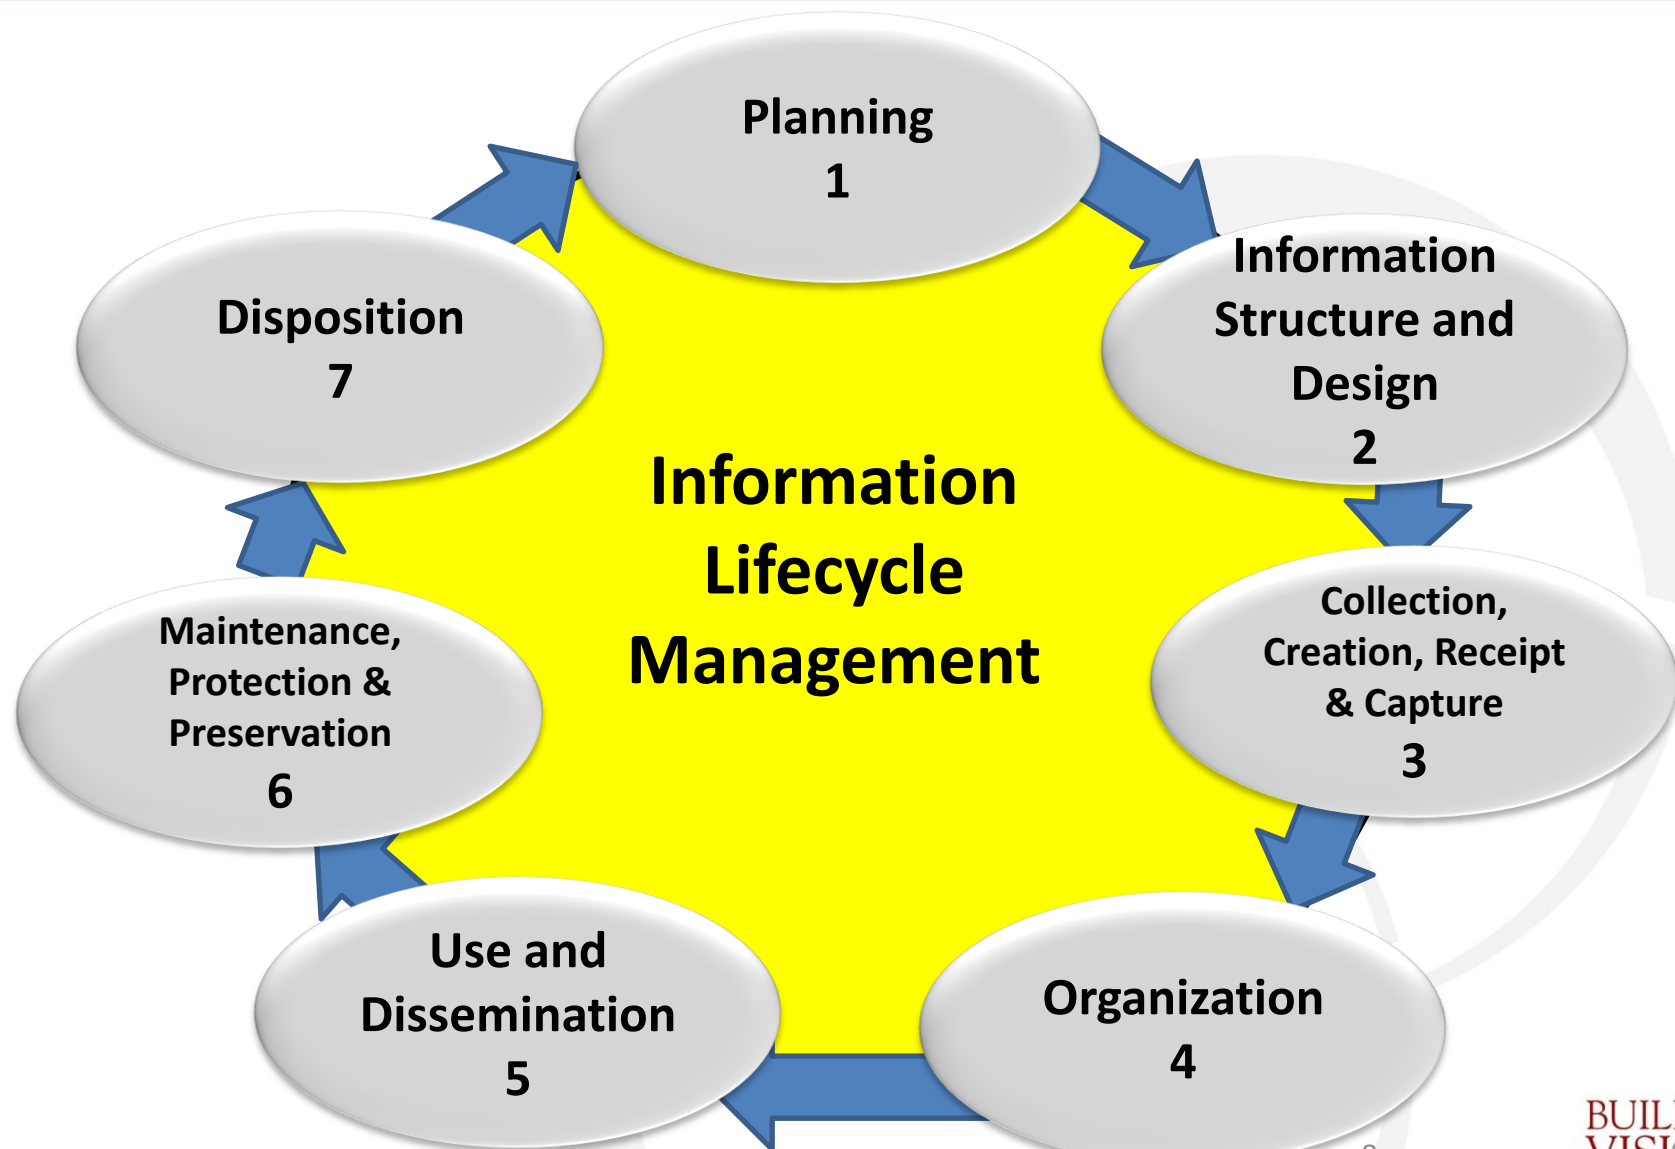

(UPDATED) What is Information ?

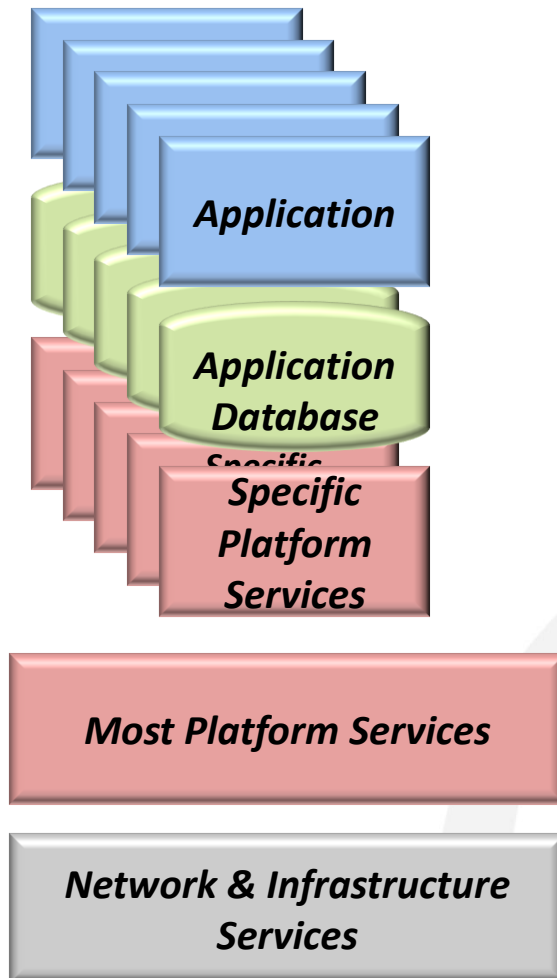

(No Change) Information Lifecycle

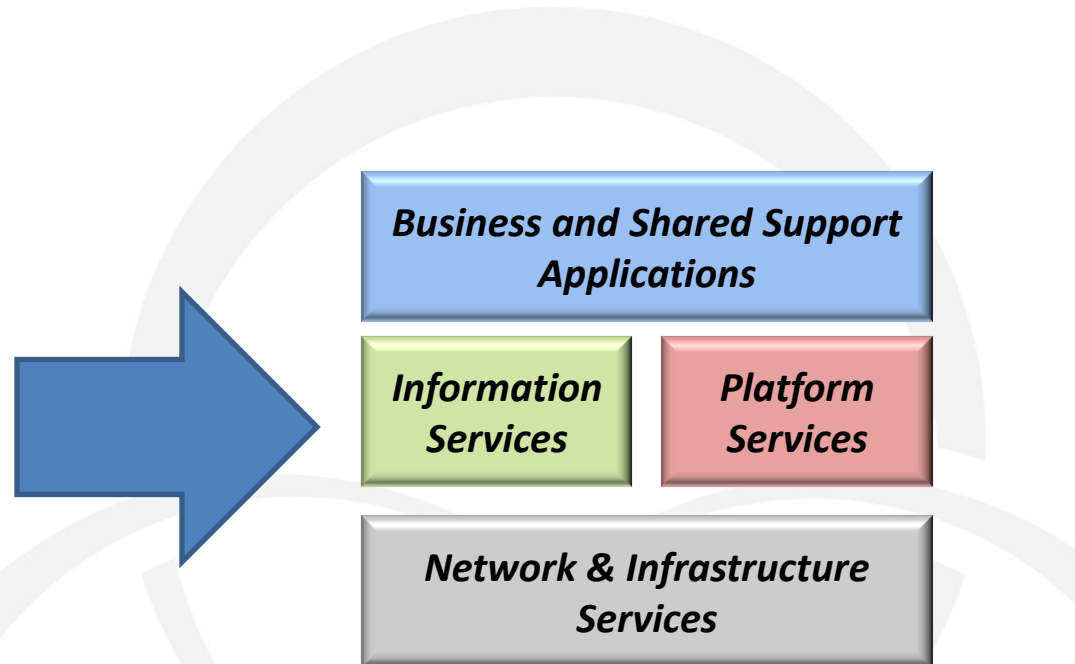

Information As a Service

Baseline (As-Is) Architecture

Target Architecture

- Simple with Major Ramifications
- Introduction of Information Standards

QUESTIONS ?

Presented By:

Mr. Robert (Bob) Weisman MSc, PEng, PMP, CD
CEO/Principal Consultant, Build The Vision Inc.

EXTRA SLIDES

- Information Governance
- **Information Planning and Architecture**
 - At enterprise level and distinguishes architecture from more detailed design
 - focuses on the creation of architecture based plans
- Operational Information Provision
 - delivers the specification and provision of data used by transaction-based systems for operations and administration
- Decision Support / Business Intelligence Provision
 - Specification and provision of information used to inform strategic and operational programs, set priorities and meet reporting requirements

- **Records and Archives Management**
 - **Records and Archives merged**
 - Creation and providing access to records and documents used by organizations to transact business and/or meet legal obligations.
 - Providing access to information (records) that have long-term value in an enterprise context as well as disposing those that do not
- **Access to Information / Privacy Provision**
 - Services and processes that ensure access to corporate records and protection of personal information

Enterprise IM Functions

Privacy and Access to Information

** Records and Archival Management

Decision Support / Business Intelligence Management

Operational Information Management

** Information Planning and Architecture

Information Governance

Types of Information

Un-Structured

- Library
- Imaged Documents

Semi-Structured

- E-docs
- Web content

Structured

- Database – Generic
- Integrated Data
- Knowledge Representation

Phase 1 – Information Needs and Planning

Phase 2 – Information Structure and Design

Phase 3 – Information Collection, Creation, Receipt, and Capture

Phase 4 – Information Organization

Phase 5 – Information Use and Dissemination

Phase 6 – Information Protection and Preservation

Phase 7 – Disposition

Information
Lifecycle

Updated Planning Sheet
