

TETware *professional* Version 1.4

Realtime and Embedded Systems Extension

Alan Haffenden, Product Manager

TETware *professional* . . .

THE *Open* GROUP

. . . is a Test Execution Management System that takes care of the administration, reporting and sequencing of the tests providing a single common user interface for all of the tests that you develop.

Supported Platforms

THE *Open* GROUP

- UNIX[®] (all versions)
- Linux[®] (all versions)
- 32-bit Windows[®]
- All provide a file system and support for multiple processes.

TETware *professional* 1.4

THE *Open* GROUP

- Adds support for testing on Realtime and Embedded Systems
- Systems that may not have file systems and may not support multiple processes
- Systems that comply with POSIX 1003.13.

POSIX 1003.13 Profiles

THE *Open* GROUP

		Process	
		Single	Multi
File System	No	51	53
	Yes	52	54

- TETware *professional* supports testing on Profile 54
- Realtime and Embedded Systems extension adds support for profiles 51 to 53.

Beta Testing

THE *Open* GROUP

- Alpha testing carried out during development
- Now needs beta testing with more realtime and embedded systems as targets
- You are invited to participate as beta testers.
