Drupal Developer: 6+ Month Contract - Remote

We are a global consortium that enables the achievement of business objectives through IT standards. We lead the development of open, vendor-neutral IT standards and certifications through collaboration with subject matter experts, forum members, and a governing board.

We have an immediate need for a Senior Drupal 7 Developer to join our team. We are using Drupal 7 automate business workflows with full audit trails. This project divides the actual screen content from development efforts, allowing displayed content to be managed by business subject matter experts. To accomplish this we are extending Drupal with custom modules where necessary. We are using the Drupal API standards, Drupal recommended documentation, Drupal database interface, and Drupal Form API.

This will be a 6-month contract, with the possibility of extension.

Essential Functions and Tasks

- Work with a remote development team on custom Drupal modules
- Replicate screens from current systems and interpret specifications into Drupal modules/codes/extensions
- Utilize custom workflows and create API compliant code based on existing screenshots across multiple systems
- Use the Drupal Administration Interface

Requirements

- Experience using Drupal API and Theming System
- Experience with custom module development
- Hands-on experience with PHP programming
- Comfortable with Drupal Administration Interface
- Ability to program for cross-browser compatibility
- Solves issues quickly while still following proper procedure
- SQL experience a plus
- Ability to work independently and meet deadlines
- Must be available during East Coast US business hours for virtual meetings with project team members
