

Bridging from TOGAF™ 8 Certified to TOGAF™ 9 Certified

The purpose of the bridging option is to enable individuals who are TOGAF 8 Certified to obtain TOGAF 9 certification.

The bridging option exists to recognize the existing investment in TOGAF certification for individuals who have achieved the TOGAF 8 Certified qualification.

Individuals who have qualified as TOGAF 8 Certified can bridge directly to the TOGAF 9 Certified qualification.

Target Audience

- Individuals who have achieved the TOGAF 8 Certified qualification
- Individuals who require a deeper understanding of TOGAF 9
- Professionals who are working in an organization where TOGAF 9 has been adopted and who need to participate in architecture projects and initiatives
- Architects who will be responsible for developing architecture artifacts
- Architects who wish to introduce TOGAF 9 into an architecture practice
- Architects who want to achieve a recognized qualification to demonstrate their detailed knowledge of TOGAF 9

The Value of this Certification

Individuals certified at this level will have demonstrated their understanding of:

- An understanding of the differences between TOGAF 9 and TOGAF 8.1.1
- How to apply the ADM phases in development of an enterprise architecture
- How to apply Architecture Governance in development of an enterprise architecture
- How to apply the TOGAF Architecture Content Framework
- How to apply the concept of Building Blocks
- How to apply the Stakeholder Management Technique
- How to apply the TOGAF Content Metamodel
- How to apply TOGAF recommended techniques when developing an enterprise architecture
- The TOGAF Technical Reference Model and how to customize it to meet an organization's needs

- The Integrated Information Infrastructure Reference Model
- The content of the key deliverables of the ADM cycle
- How an enterprise architecture can be partitioned to meet the specific needs of an organization
- The purpose of the Architecture Repository
- How to apply iteration and different levels of architecture with the ADM
- How to adapt the ADM for security
- SOA as a style of architecture
- The role of architecture maturity models in developing an enterprise architecture
- The purpose of the Architecture Skills Framework and how to apply it within an organization
