Open Footprint™ Forum

Global Event

June 23-24, 2021
Open Footprint™ (OFP) Forum – Global Event
Introduction to Open Footprint

- Key OFP Deliverables
- OFP Projects

Sammy Lakshmanan
Global Managing Partner, Digital Services
ERM
Co-Chair
Open Footprint
What are we trying to accomplish?

- Calculate the carbon footprint for a company and/or product is made much easier
- Share information across organizations and customers with respect to the carbon intensity of your products
- Visualize the company’s carbon footprint in a consistent and harmonized manner to measure performance
- Report information to external stakeholders and industry groups

Industry standard (and Open Source based) data platform to view and share emissions related data

OFP is focused on creating a set of deliverables that facilitate this objective
Introducing Key OFP Deliverables

<table>
<thead>
<tr>
<th>Data Platform</th>
<th>Reference Architecture &amp; Implementation</th>
<th>User Interface / Reporting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Consistent way of exchanging, processing and storing emissions related data</td>
<td>A template for organizations looking to apply the OFP solution, ranging from data entry to reporting to integration</td>
<td>User interface to store, view and report the emissions related data, including those that are shared across boundaries</td>
</tr>
<tr>
<td>Align with reporting standards and frameworks</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Enable data to be accessible</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

More to come in Data Platform session

More to come in Reference Architecture session

More to come in Demo session
Iterating in an agile way

**Scope**
- GHG Scope 1
- GHG Scope 2
- GHG Scope 3

**Technical Functionality**
- User Interface for Data Loading
- Reporting Tooling
- Calculations

**MVP1**
- Q2 2021

**MVP2**
- Q3-Q4 2021

**Data Platform**
- Reference Architecture
- User Interface / Reporting
