FACE® and SOSA™ Consortia TIM - MOSA in Practice Paper Presentations on November 13-14, 2024

This year the TIM focused on MOSA (Modular Open Systems Approach) in Practice and how MOSA benefits from both the FACE and SOSA approach.

MOSA is a strategic standardization initiative by the U.S. Department of Defense (DoD) that requires the thousands of products and systems the services acquire every year to work together more productively.

Technical papers provide an opportunity for members to submit papers and presentations that demonstrate (through implementation and examples) the positive impact of FACE adoption by buyers, suppliers, integrators (end users), and business representatives, including business, data modeling, and technical applications and lessons learned. Register [here](#).

TOGAF® Tool Certification launched for the TOGAF Standard, 10th Edition

We are pleased to announce that TOGAF® Framework Tool Certification is now available for the tools supporting the TOGAF Standard, 10th Edition. Certified tools support the creation of consistent models and deliverables, fostering effective transformation initiatives and ensuring a unified architecture development process; also certified tools help organizations implement the TOGAF approach and Architecture Development Method (ADM).

For details on how to apply for certification [click here](#).
