Join The Open Group Open Professions Discord Server!

We have relaunched the Open Professions Open Hours service, If you would like to find out more, please join us on our first Open Professions Office Hours call, on Thursday October 10, at 10am EST/3PM UK on our [Discord Channel](#).

[Join Now](#)

Security Forum Updates

- The Security Forum continued its work on the next version of the Zero Trust Reference Model, focusing on refining architectural building blocks and capabilities. This effort is occurring simultaneously to work on a Zero Trust Implementation Guide and Zero Trust Roles and Glossary document, providing a full view of all those involved and guidance in prioritizing the implementation process
- The Security Forum also made the consensus decision to enter into Forum Review the “Using Quantitative Analysis in System Threat Modeling: Adopting Open FAIR™ Analysis with Threat Modeling to Maximize Return on Security Investment” White Paper. Finally, the Security Forum continued its work to update the Open FAIR Standards to ensure consistency with the NIST CSF 2.0

The Open Trusted Technology Forum Update

- The Open Trusted Technology Forum primarily focused on continuing its work to enhance the Open Trusted Technology Provider™ Standard (O-TTPS). To do this, they utilize the process described and documented in the Open Trusted Technology Provider Framework (O-TTPF), Guide which acts as the basis for the O-TTPS documents

The Assured Dependability Work Group Update

- The Assured Dependability Work Group continued its effort on the next version of the Open Dependability through Assuredness™ (O-DA) Framework. To this end, Members of the ADWG worked to document a use case on implementation of the O-DA Framework that included aspects of Zero Trust. They presented this use case to Members of the Security Forum Zero Trust Architecture Working Group and received feedback and comments. This discussion will resume at [The Open Group Houston Summit 2024](#)
