O-TTPS Update Project

The Open Trusted Technology Provider™ Standard (O-TTPS) Update Project made progress on its planned goals and deliverables.

- The O-TTPS Update Project Team finalized revisions to the Open Trusted Technology Provider™ Standard (O-TTPS), Parts 1 and 2, working to bring it to Version 1.2. These documents successfully entered and completed formal Open Trusted Technology Forum Review and moved forward to Company Review. Publication is expected in 2Q2022.

- The Project Team successfully finalized the overhaul of the O-TTPS, Part 1, changing twelve “should” requirements to “shall” requirements and making them mandatory for certification. This entailed debating each requirement for value and efficacy. The Project Team also added several entirely new requirements as a result of these discussions, splitting previous requirements into more specific ones or identifying previously unaddressed areas.

- Having completed revisions to the O-TTPS, Part 1, the Project Team finalized updates to the O-TTPS Part 2. This entailed determining appropriate Evidence of Conformance, whether Process Evidence, Implementation Evidence, or both for all added “shall” and new requirements. The Project Team also worked to clarify the Evidence of Conformance and Specific Requirements for Assessor Activities for many otherwise unaltered requirements. Moreover, the Project Team updated references to related requirements, ensuring consistency with other implemented changes.

- The O-TTPS Update Project Team began coordinating with The Open Group staff on updates to the O-TTPS Certification Program, focusing on strengthening the Self-Assessed Certification Process and considering implications for the Third-Party Assessed Certification Process based on updates to the O-TTPS.

Assuring customers of the integrity of commercial off-the-shelf (COTS) information and ICT products worldwide and safeguarding global supply chains against increasingly sophisticated security attacks.

About The Open Group

Leading the development of open, vendor-neutral technology standards and certifications

The Open Group is a global consortium that enables the achievement of business objectives through technology standards. Our diverse membership of more than 800 organizations includes customers, systems and solutions suppliers, tool vendors, integrators, academics, and consultants across multiple industries.

Vision

Boundaryless Information Flow™ achieved through global interoperability in a secure, reliable, and timely manner.

Mission

The mission of The Open Group is to drive the creation of Boundaryless Information Flow™ achieved by:

• Working with customers to capture, understand, and address current and emerging requirements, establish policies, and share best practices
• Working with suppliers, consortia, and standards bodies to develop consensus and facilitate interoperability, to evolve and integrate specifications and open source technologies
• Offering a comprehensive set of services to enhance the operational efficiency of consortia
• Developing and operating the industry’s premier certification service and encouraging procurement of certified products

Keys facts include:

• Over 870 Member organizations, with 43,000+ participants in The Open Group activities from 126 countries
• Our Platinum Members are DXC Technology, Fujitsu, HCL, Huawei, IBM, Intel, Micro Focus, and Philips
• Developing and operating the industry’s premier certification service and encouraging procurement of certified products
• Services provided include strategy, management, innovation and research, standards, certification, and test development
• Over 103,000 TOGAF® 9 certifications worldwide
